WORK EXPERIENCE

Rand Merchant Bank

Jul. 2025 – Present

Software Developer

Johannesburg, Gauteng

- Design, develop and maintain enterprise financial applications using Java, Spring Boot and Angular.
- Develop production-ready client-facing solutions and REST APIs.
- Write clean, maintainable code with unit tests.
- Produce technical documentation and collaborate within Agile teams.

Rand Merchant Bank

Jul. 2024 – June.2024

Graduate

- Rotated across Business Analysis, Software Development, and Quality Assurance, gaining end-to-end exposure to the Software Development Life Cycle (SDLC).
- Gathered, analysed, and translated business requirements into technical specifications, collaborating with stakeholders to deliver business solutions.
- Developed and maintained enterprise applications using Java, Spring Boot, and Angular, including RESTful API integration.
- Wrote SQL queries to validate data, support application development, and verify system functionality.
- Executed functional, integration, regression, and user acceptance testing using HP Quality Center (ALM), while logging and tracking defects.

ABSA

Mar. 2023 – Apr. 2024

iOS Developer

Johannesburg, Gauteng

- Developed an iOS application (Agri Fund) using Swift, UIKit, and MVVM. The application enables South African farmers to apply for business funding from ABSA.
- Worked on ABSA's iOS platform to migrate old code from Barclays Mobile Gateway (Objective-C) to Absa's Express (Swift) on the credit Card Hot Leads feature
- Collaborated on a feature (Upgrade Device) allowing the bank's customers using iOS devices to upgrade their mobile devices through the banking app
- Restful API integration
- PR reviewing
- Unit Testing

EDUCATION

University of Witwatersrand

Feb. 2026- Dec. 2027

Master of Science Computer Science

Johannesburg, Gauteng

Research Project - Memory as a decision process : Policy-Based Selective Memory for Financial Risk Forecasting. This project investigates whether selective memory can improve financial risk forecasting. It uses reinforcement

learning to learn which historical market observations should be stored, discarded, or replaced before predicting future market volatility.

University of Witwatersrand

Bachelor of Science Honours Computer Science

Feb. 2025- Dec. 2025

Johannesburg, Gauteng

Relevant coursework -Robotics, Language Processing, Probabilistic Graphical Models, Artificial Intelligence, Adaptive Computation and Machine Learning, Discrete Optimisation, Introduction Data Visualization and exploration

Research Project - Using Bayesian Networks to predict Diabetes.

Sefako Makgatho Health Sciences University

BSc Mathematical Science, Majoring in Mathematics and Computer Science

Feb. 2019 - Dec. 2021

Pretoria, Gauteng

Relevant coursework - Data Structures, Database Systems, Artificial Intelligence, Software Engineering, Linear Algebra, Calculus, Computer Networks, Statistics

SKILLS

Technical Skills:

Programming languages: Swift, Python, Java, CSS, HTML, JavaScript, React, Angular

Databases: MySQL, PostgreSQL, Firebase

Including: SQL data extraction, Data validation, Query optimization and Data analysis

Soft Skills

Teamwork

Innovative

Resilience

Excellent problem-solving skills.

Strong communication and interpersonal skills
